-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

3. Claims 8-12 are objected to because of the following informalities:

Claims 8-12 recite a preamble of "the liquid crystal display" while the based claim 7 recites a backlight module. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 7-9 and 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakamaru et al., JP 2001-281654.

The above claims are anticipated by Nakamaru et al. figures 1 and 8, which disclose a liquid crystal display (LCD) element comprising:

Art Unit: 2871

- . a backlight module (figure 1) having a light source (104), a light guide plate (101) with a plurality of V-shaped grooves on a top surface (see figure 5(b)) and a plurality of dots (103) on a bottom surface, a reflector (106) and a quarter-wave plate (109);
- . an LCD panel having a polarizing element (107);
- . a brightness enhancing film (polarization division plate 108).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-6, 10 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamaru et al., JP 2001-281654, in view of Iijima, US Patent No. 6,906,767.

Regarding claims 1-6, 10 and 13, Nakamaru et al. disclose the claimed invention as described above except for a reflective polarizing plate and a diffuser. Iijima does disclose an LCD device with a diffuser (30) having a reflective polarizing plate (40) together with a backlight module (70, 80) (see figure 9). Therefore, it would have been obvious to one skilled in the art at the time of the invention was made to employ a reflective polarizing plate (instead of the Nakamaru et al. polarizing plate) and a diffuser in an LCD device as shown by Iijima in order to improve display characteristics (e.g., display brighter – see col. 14, lines 27-28).
